

Composition Categories Game

The Composition Categories Game involves the materials things are made of. As always, let your mind go - consider nouns, verbs, adjectives, and adverbs. Choose words and phrases that connect, no matter how remotely, to your category. For example, if you were thinking about Wood, you might choose something involved in the process of preparing wood to be useful - debarking, or a kind of wood - Douglas fir, or something made of wood - desk, or a characteristic of wood - durable.

By the way, thinking of three "O's" for all these categories was tough. If you can do it, give yourself a pat on the back!

Of course, you can do these simple games by just thinking up answers. But I have included a download version, in case you want a hard copy. On the second page of the download, you will find my answers.

Have fun!
